DURAWHITE[®]

MARBLE AGGREGATE

For White Pool Plaster Applications

DuraWhite[®] crushed aggregate for pool plaster applications is a very carefully sized marble that provides a pristine, smooth and durable bright white finish when mixed with cement and water. The consistency of DuraWhite means it mixes and applies easily and smoothly and gives great touch and feel when troweled. The marble aggregate's physical makeup produces a non-abrasive product that gives your customers a finish that's comfortable to the touch with no grittiness.

DuraWhite[®] Typical Properties

Typical Chemical Analysis

Calcium Carbonate (CaCO ₃ ; PLA 4-70)	96%
Magnesium Carbonate (MgCO ₃ ; PLA 4-70)	2.5%
Silica and Silicates (SiO ₂ ; ASTM C-25)	0.4%

Mineral Properties

Color	White
Alkalinity (as NaOH; ASTM D-1208)	0.4 mg/gm
pH (ASTM-1208)	9.4 (Saturated Solution)
Hardness*	3 Mohs; Relatively Non-Abrasive
Solubility*	0.0035 g/100 ml H ₂ O at 100°C
Particle Shape (Microscope)	Irregular, Uniaxial
Specific Gravity (ASTM D-153)	2.7
Refractive Index*	1.6
Linear Expansion Coefficient*	4.3 x 10 ⁻⁶ /°C
Weight/Solid Gallon (s.g. x 8.345)	22.6 lbs/Solid Gallon (0.0443 Solid Gallon/lb)

*Handbook of Chemistry and Physics

Typical Size Distribution

% Larger than 12 Mesh	0.5%
% Larger than 16 Mesh	6%
% Larger than 50 Mesh	55%
% Smaller than 200 Mesh	10%

Typical Physical Properties

Loose Bulk Density (lbs/ft ³)	100
Compacted Bulk Density (lbs/ft ³)	115

These typical properties cannot be considered as specifications.

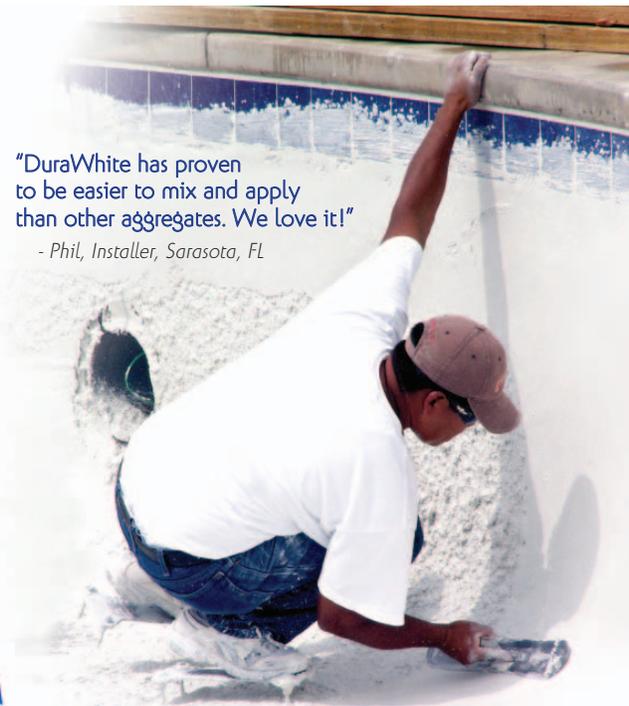

Huber's First-Class Service and Care

Along with the great performance you'll get with DuraWhite[®] marble aggregate comes the unparalleled technical service and customer care you will receive from Huber Engineered Materials.
